Computer Engineering graduate from Himalaya College of Engineering with a strong interest in web development. Skilled in building user-friendly, efficient, and scalable web applications, with a continuous focus on learning and applying modern web technologies. Motivated team player eager to collaborate, grow, and contribute in a dynamic tech environment.

EXPERIENCE

Software Developer Intern

Tokha, Kathmandu

UpchaarNepal

Jun, 2025 - Dec, 2025

- Built 3 full-stack MVPs from scratch using the MERN stack (MongoDB, Express.js, React, Node.js).
- Designed and integrated RESTful APIs with Node.js and Express, managing MongoDB schemas and CRUD operations while following clean code and scalable architecture best practices.
- Developed responsive, reusable React components with TypeScript, using TanStack Query for data fetching and React Hook Form for form handling and validation.
- Built Projects: UpchaarNepal | Diagnostic, UpchaarNepal | Clinic, UpchaarNepal | Pharmacy

Full Stack Developer

Nayabazar, Kathmandu

NxtWaveAI

Dec, 2024 - Present

- Started as a Full Stack Developer Intern, contributing to the development of scalable SaaS applications and delivering production-ready features for client projects.
- Developed full-stack applications using Next.js, Express.js, NestJS, PostgreSQL, and Prisma, building responsive frontends and secure backend APIs
- Collaborated with clients and cross-functional teams to gather requirements, implement new features, and troubleshoot production issues.
- Integrated AI-powered functionalities, containerized applications with Docker, and followed best practices to build scalable, maintainable, and high-performance solutions.

EDUCATION

Bachelors in Computer Engineering

Lalitpur

Himalaya College of Engineering

Apr, 2022 - Jun, 2025

Grade: 72.85%

PROJECTS

FeastWave:- FULL STACK

- Food Delivery Application: Developed a full-stack food delivery platform using the MERN stack with separate user and admin panels for managing orders and products.
- Implemented user authentication, Stripe payment gateway integration, and a fully functional cart and checkout workflow.

https://github.com/lihasahil/Food_Delivery_App

SocialBook:- FULL STACK

- Social Media Application: Developed a full-stack social media platform using Next.js to create and share text and image-based posts.
- Implemented Clerk authentication, used PostgreSQL for data persistence, and built a responsive interface with shadcn/ui components.

<https://social-book-psi.vercel.app/>

Formaker:- FULL STACK

- Built a full-stack form builder application using Next.js, PostgreSQL, and Prisma ORM, enabling users to create, manage, and submit dynamic forms with persistent data storage.
- Integrated Gemini API to generate form questions and validation logic dynamically, improving form creation efficiency and user experience.

<https://formaker-beta.vercel.app/>

GuffGaff:- FULL STACK

- GuffGaff Chat Application: Built a real-time chat application using the MERN stack (MongoDB, Express.js, React, Node.js) with Socket.IO for instant messaging.
- Implemented real-time message updates, user presence, and backend API integration, ensuring scalable and responsive communication.

TRAINING/CERTIFICATIONS

Responsive Web Design

freecodecamp.org

freecodecamp.org/certification/SahilShrestha/responsive-web-design

MERN Stack Training

2025

Himalaya College of Engineering + Broadway Infosys

Our college provided MERN stack training with mentors from Broadway Infosys.

SKILLS

MERN Stack, React JS, Javascript/Typescript, Git / Github, HTML & CSS, Bootstrap,Tailwind Css, NextJs, Tanstack React Query, React Hook From, Redux and Redux Toolkit

LANGUAGE

Nepali, English
